

Collect Litter and Litter data so we can chart actionable ways to reduce wastes at different levels around our community!

How to Participate With **LITTERATI**

1
Download the **Litterati** app on your phone and create an account (we recommend using the email option).

In the app, join our local challenge:

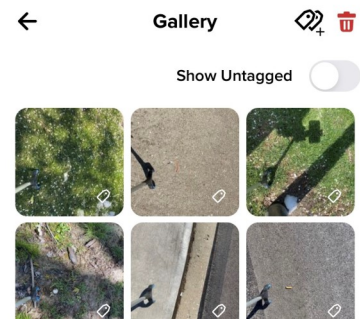

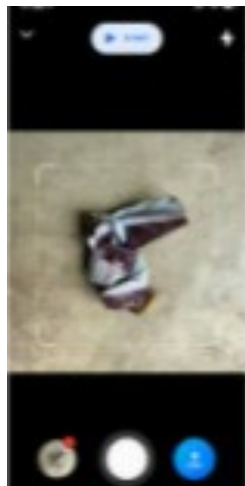

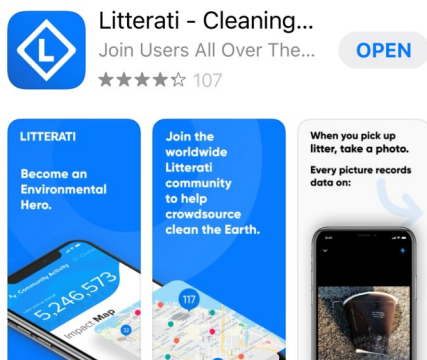

Cuyahoga Community Collects
CUYAHOGA21

2
As you clean up, use the app to take a photo of each piece. Litterati will automatically geotag and time stamp each photo.

Use the app button or the side button on your phone for a one hand shot.

3
Upload photos when done and wifi is accessible. Then tag your photos in the gallery where the Artificial Intelligence (AI) capability will assist you with suggestions.

Tag the Object, Material and Brand to your photos: this will help the analysis for solutions.

Questions about Litterati? Email or call Elizabeth Hiser, Watershed Program Manager at Cuyahoga Soil & Water Conservation District
