

Euclid Creek Watershed Communities
Public Involvement Public Education (PIPE) Program Committee
2019 Event Series – Euclid Creek PIPE Committee Draft Work Plan (February Update)
Approved February 22nd by PIPE Committee.

Education Theme for 2019: *Reduce Runoff - Slow It Down, Spread It Out, Soak It In* – Increased stormwater runoff from impervious surfaces and lawns negatively impacts water quality and aquatic habitat in our local waterways and Lake Erie. Implementing small-scale stormwater management practices such as rain gardens, rain barrels, trees, improved soil health and impervious surface/turf reduction help the built environment to better mimic the way water flows through the natural environment, reducing negative impacts to water quality.

Beachwood

Involvement / Education Event:

- [Middle School Rain Garden Invasive Management – March 19th](#)
- [FOEC Rain Barrel Art Workshop – June 1st and 2nd](#)

Education Events:

- [August Lake Erie Panel](#)
